# 01 INTRO

Paw coin was launched on August 8th, 2021, on International cat day. Paw coin is a decentralized meme coin to make an intro of cryptocurrency to the young generation.

Meme coins, Doge coin, Shiba Inu, and Akita have been a chartbuster in 2021. Meme coins seem meaningless coin at a glance. However, meme coins are crucial because the coins raise the awareness of coins to youngsters. And they would be capable of obtaining benefits from holding tokens. The structure of meme coins is more transparent than other crypto projects manipulated by corporates since it is a community-driven project with DeFi executed as described in an audited smart contract.

The cutest part of the dogs and cats is the paws. To celebrate international cat day, the Paw coins were launched. This is a conceptional document to elucidate how adorable the paw is and how you can take advantage by holding the Paw coins.

## 02 CORE VALUE

### **Transparency**

Paw coins are decentralized and supported by the jolly Paw communities.

### **Cuteness**

What is the cutest part of dogs and cats? It's a paw, and the Paw should deserve the same level of respect because it is the most undervalued part of the animal.

### **Community**

Paw communities with the cuteness would be one of the fastest-growing communities and the most popular meme coins.

### **Beneficial**

Paw would appreciate the Paw HODLers by possessing and supporting the coins. Therefore, Paw would distribute all the profits that occurred by buying, selling, and transferring coins to the HODLers as much as they hold.
